<sup>\*\*</sup> This drawing is meant to be used as a guideline for information. Contact your local utility or the State Electrical Inspector for questions.

Permit? Y=Yes, needs energizing permit. N=No, Does not need energizing permit. Service Location: M=Meter Pedestal. B=Building Mounted. P=Pole Mounted

- 1 Square Footage or % of structure used. 30 % of the homes square footage used for mother in law apartment or home business with common utilities (water, sewer, electricetc.)
- 2 Complex Structure. I.e. any structure with a door.
- 3 Temporary services are treated the same as the permanent service for permitting purposes.
- 4 OK to connect single family services if the building is 'weathered in' (i.e. roof finished, walls sheathing installed, windows and doors installed or closed in with plastic or plywood) or the service uses a meter breaker combination socket.
- The State may assert its jurisdiction for special cases that may not normally require an inspection (i.e. industrial agriculture, county fairs, concert venues or circus')
- **6** When in doubt request a determination from the State Electrical Inspector.
- **7** If the service is new or has been disconnected an energizing permit is required.
