

Member Update

Commercial/Industrial Edition
Winter 2019

We all know bad weather can bring power outages. That's why VEC continues to take specific steps to make our system more reliable and resilient in the face of inclement weather. How exactly? Find out [here](#).

Some help for cleaner, more modern technology

[VEC's Energy Transformation Program](#) offers incentives for commercial and industrial members who shift their power systems to cleaner, less-carbon intensive equipment. The Clean Air Program, for instance, can help members now using diesel or propane to switch to electricity. We're also now offering incentives for electric forklifts.

Any chance you could help us out?

We're always looking to improve our service to you. Could you take this [two-minute poll](#) so we can continue to improve our communications with you? Thank you, in advance!

Would you like to help lead the co-op?

Do you (or someone you know) want to serve on the VEC Board of Directors? We have [seats up for election in three of our districts, with voting concluding at our annual meeting May 11 at Jay Peak Resort.](#)

Please forward this email to anyone who might be interested.
